

CNC Laser Cutting Systems

LM-1318

LM-1325

F-SERIES Models

LM-1310 (double door)
LM-1325/1530 Opened design

Laser tube
Yongli 280W

Machine Feature

- 280W CO₂ laser cuts multiple materials: wood/acrylic/steel
- Most cost effective laser capable of cutting 1.2mm carbon/stainless steel (steel only, consider fiber lasers for other metals)
- Capacitive Auto-height adjusting cutting head
- Programmable cutting assist gas solenoid
- CO₂ laser offers economy option over fiber laser
- Lowest cost steel cutting capabilities

Machine Spec

WEIGHT & DIMENSIONS	Engraving Area	1300*1800mm/1300*2500mm
	Machine Dimensions	1955X3675X1095mm
	Weight	700KG/90KG
LASER	Laser Type	Sealed CO2 Laser Tube
	Laser Power	DLT280W Yongli
SYSTEM	Driving System	Stepper
	Cooling Mode	Recirculating Water-cooling and protection system
	Operating Temperature	0 - 45° C
INCLUDES FREE	Processor	DSP+USB
	Software	Laserwork
	Table	Blade worktable
	Water Pump	Basic water pump
	Exhaust fan	Basic Exhaust Fan
WARRANTY	Parts/Labor	1 year limited warranty (excludes shipping/consumable items)

Machine Samples

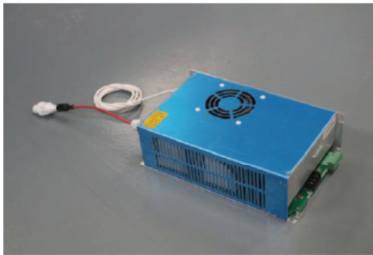

Machine standard accessories

Laser tube

Brand: Reci

Function: Provide laser to cut through materials

Laser power supply

Brand: LASERPWR

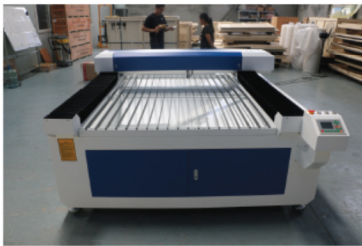

Provide power for laser tube

Reflect Mirror & Focus lens

Brand: USA II-VI

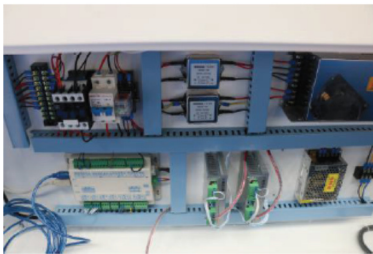

Transfer and focus laser power

Working table

Blade worktable/Honeycomb table

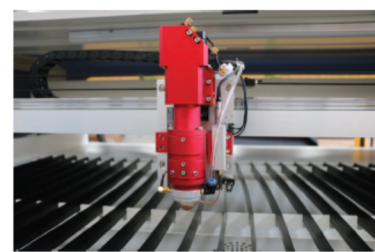

Suit for hard materials, such as acrylic, MDF, wood etc

Control board system & software

Brand:

The control parts of laser machine, provide data

Auto-height adjusting cutting head

Can auto find focus according metal sheet thickness

Cooling System

Brand: S&A CW series

Cooling laser tube, prolong lifetime of laser tube.

Exhaust fan

Brand: Jinan Taitong

When cutting materials, it will have dust and smoke, exhaust fan remove it.

Air pump

Brand:

Cool lens and blow away smoke at the laser head while laser is cutting.
